Product name	Laboratory Jaw Crushers

DESCRIPTION

Laboratory jaw crushers allow you to process hard materials in extremely small sizes. In this sense, the laboratory type jaw crusher allows product output between 0 and 5 mm. You can also achieve higher product output by adjusting the grain size.

The laboratory jaw crusher is built to create a high user experience. In this direction, uninterrupted spare parts support of the device, which has an extremely ergonomic structure, can also be provided by us. At this point, the device has an extremely durable and highly resistant structure with its reinforced steel construction body and all its components.

The size of the material to be crushed can be adjusted by means of the lever in the machine that is most often preferred for the first crushing process in the research laboratories of the mining research industries.
