DIGITAL POINT LOAD TEST MACHINE

DESCRIPTION

The Point Load Test Machine is used to determine the strength values of a rock and concrete specimen both in the field and in the laboratory. It consists of a load frame for applying loads up to 50 kN and 100 kN, on which a manual hydraulic jack is mounted. The instrument accepts core specimens up to 4" (101,6 mm) diameter which are loaded by two cone shaped points. A graduated scale indicates the distance between the conical points. The applied load is measured by a pressure transducer with a digital display unit range 0-50 kN and 0-100 kN

TECHNICAL SPECIFICATIONS

Model	AG1390/50	AG1390/100
Capacity	5 Tons	10 Tons
Display	Digital readout screen	Digital readout screen
Carrying Case	Type of land together with a complete set of wooden carrying case	Type of land together with a complete set of wooden carrying case
Weight	60 kg	72 kg
Dimensions	400x700x600 mm	440x730x640 mm
Power	220-240 V 50/60 Hz	220-240 V 50/60 Hz

THANK YOU

FOR CHOOSE US

Dear business partners, thank you very much for believing in us and recommending our products to your customers; We sincerely believe that our company will grow even more in 2023 thanks to you, our esteemed business partners.

You can reach us than our phones or e mail address 24 hours a day.
